Claim Rust Problem Has Been Solved

(University of Alberta News Letter).
Reports presented by members of the national research council associate committee on field and crop diseases at its recent Winnipeg meeting indicated rapid progress in combating plant disease enemies. The complete solution of the stem rust problem of wheat is now in sight. New varieties of wheat equal to marquis in yield and satisfactory in quality, earliness, and strength of straw, are expected to be ready for distribution to farmers in two or three years. This is regarded as a scientific achievement of the first order, and is the result of good organization and co-operation among all plant pathologists in the prairie provinces both federal and provincial. With the rust problem nearly out of the way, the same group is turning its guns upon the smuts and root-rot, two classes of disease which are becoming more prevalent and injurious. It took about ten years of organized effort to solve the rust problem, and equal success may be anticipated in the fight against these other diseases.

Auction Sale On Saturday

Remember Lee Taylor's auction sale on Saturday evening, commencing at 7:00 o'clock, on Geo. Dupuis' premises, opposite the hotel. The offerings include a complete outfit of house-hold effects, a wagon, tools and other miscellaneous effects, and a large quantity of groceries. There are many desirable purchases which may be made at this sale and most everyone would find something they want at the moment. See posters and don't forget the time and place.

Blusson Hears About India

An appreciative audience listened to an address on India in Blusson school on Tuesday evening April 21st, given by Rev. Fraser Smith M.D. an honored retired missionary both of China and India. Before Dr. Smith's address a social hour was spent in music and song. The following was the programme.
1. "O Canada."
2. Reading by Jimmie Carlson, "What the Bees Do."
3. Piano Solo, Margaret Patterson.
4. Violin Solo, Helen Higgins.
5. Reading by Mrs. P. Dawson, "The Kingdom of Content."
6. Piano Solo, Miss Kay.
7. Solo, Rev. Dawson, "Asleep in The Deep."
8. Address, Dr. Fraser Smith.
9. Games.
Refreshments were served under the convener'ship of Mrs. P. M. Patterson and Mrs. H. Higgins. The evening closed by the singing of Auld Lang Syne. Mrs. J. W. Cain made an excellent chairman.

Clark Rhodes was home for the week end and Mrs. Rhodes and Miss Gladys left for Conhurst on Tuesday, where they will reside in future. Everyone will wish the Rhodes family success in their new home.

Mrs. B. W. Wright and daughter of Medicine Hat, and Mrs. Dobbs and daughter of Vulcan, were week end visitors at the home of Mrs. J. T. Stephenson.

Sunday North Wind Raised Big Dust

We have had wind storms galore this spring, but Sunday's gale from the north, carrying dust to an extent that sometimes necessitated the use of artificial light, was one of the worst experienced for a long time. Spring housecleaning has become a thing of every day occurrence in this vicinity instead of an annual affair. The temperature on Sunday was decidedly frigid to make matters even worse. On Monday morning all nature was smiling while the population aimed themselves with brooms and dusters and started the big job of cleaning up after the blow.

Make Flour Sacks Things of Beauty

The flour sack competition and afternoon tea held by the Women's Institute on Saturday was a highly successful affair, especially when the busy season is taken into consideration. The prizes were awarded to Mrs. R. J. Cowell, Mrs. J. M. Moffatt and Mrs. T. R. Jopling. The judges certainly had their hands full in making the awards as there were some beautiful articles in the competition, and naturally they were eagerly sought for when offered for sale. The financial proceeds of the event were highly satisfactory.

"Tons of Money" For Everyone

Friday, May 8th, has been definitely decided on as the date for the presentation of the comedy, "Tons of Money," by the local organization directed by Mrs. R. I. Baker. Sufficient information has been available to assure the public they may confidently look forward to an unusual treat. Not only are the actors purely local, but the assignment of the roles has been so successful that the very best in every character is fully developed, and the interpretation of the writer's ideas is as nearly perfect as could be achieved.

The play itself is written in a way that permits of wide latitude for the display of the ability of the cast and is chock full of the choicest humor, coupled with real dramatics. It is one of the coming events you simply cannot afford to miss.

An orchestra of from 15 to 20 pieces is being trained specially for this occasion by J. Geo. Harper, of the Lethbridge Conservatory of Music, who will personally direct the orchestra. To anyone acquainted with Mr. Harper's ability in this connection this is assurance that the orchestra feature alone will be worth more than the price of admission that will be charged, which, it is stated will be unusually low to conform with the financial situation.

There need be no hesitation in attending the presentation of "Tons of Money," or in inducing your friends to be present. It will unquestionably be one of the best evening's entertainment ever offered in Champion.

Mr. and Mrs. W. S. Ryan were visitors in town recently. Mr. Ryan being on his way to visit B. M. Roberts at Vulcan hospital.

THURSDAY, Apr. 23, 1931

NOTES AND COMMENT.

At a sitting of the Royal Commission, inquiring into the desirability or undesirability of permitting the dealing in grain futures, and during the examination of Dr. Boyle, of Cornell University, according to the daily press, the following exchange took place:

"Government regulation of business men is invariably regulation of experienced business men by men who have not been long in business," said Dr. Boyle. "And if the farmers in Canada are like the farmers in United States, they would not have any respect for government officials." "No farmer ever had any respect for any government in any country at any time," put in Sir Josiah.

Taking the immediately preceding statement of Dr. Boyle into account it seems possible the word "officials" may have been omitted from Sir Josiah Stamp's assertion, but even assuming this to have been the case it sounds foolish, to say the very least. As printed it is so glaringly incorrect, and so far from even decency, it is a wonder it was allowed to pass without comment, even if the speaker was chairman of the commission. A reflection on government officials or farmers, as a body, by the chairman of such an important commission, does not seem appropriate, whether taken seriously or as an attempt at humor.

A. F. Sproule, of La Fleche, Sask., a pool director, giving evidence before the Royal Grain Commission at Regina, had reached the conclusion that seventy million dollars had gone from that province in futures to "protect the grain trade." It is difficult to blame the farmers for following individually in the steps of what their collective organization was doing, but when purchases of grain futures are quoted as having been made to protect the grain trade, the absurdity must be apparent to everyone. Farmers and others bought futures because they thought there was an opportunity to make money for themselves, and to suggest these purchases were made to stabilize the market, outside of pool purchases, perhaps, is suitably foolish. Farmers and speculators bought wheat because it was lower in price than they thought it would be later. They lost their money, and now they are trying to blame somebody else for it. Saskatchewan was no harder hit in this respect than the other provinces and it is to be doubted if any of the individuals involved would have the nerve to suggest they were trying to "protect the grain trade." Many farmers have used the future market legitimately to protect their sales at a season when they felt the price was likely to improve or otherwise with success. They might have used some form of insurance with like favorable results but they are quite deluded with the results obtained from the futures market. The loser may

blame the futures market for his losses, but if he had won not one in a thousand would have attributed the result to anything but his superior intelligence and perspicacity.

The governments of the prairie provinces have decided to ask Ottawa for a grain board to handle the 1931 crop, and pressure is being brought to bear on the federal government to provide such a board. The accompanying request for a pegged price is the crux of the matter, and the likely reason no action will be taken by the Dominion authorities. It is really a pity that politics should be played in the present situation, but it would appear the situation is more or less the same in the other provinces. They do not wish to curtail their own activities to help ease conditions, but endeavor to appease the farming community by urging the Dominion government to assume the burden.

In a statement pointing out that while the receipts of the Canadian National Railway had fallen off, expenditures had been reduced by \$17,000,000, Sir Henry Thornton in discussing the present depression in business said: "The world's current financial ailments he attributed to the mechanization of industry, commenced in the days when the invention of the steam engine had been eliminated until a crisis was necessarily reached. "This circumstance," Sir Henry remarked, "produced an atmosphere of enmity between those who employed and those who worked. It led to warfare as stupid as military warfare. This condition was followed by a period when both parties tried to settle their disputes by co-operation rather than by foolish conflict."

The Alberta weather man changes his moods frequently and with rather startling suddenness. Sunday provided a cold wind from the north which filled the air with dust which penetrated everywhere in buildings of every kind, and was as miserable a day for everyone as could well be imagined. Monday morning was beautifully clear, with bright sunshine and no wind, the sort of morning that makes one glad to be alive. Tuesday morning provided the return of the cold north wind, with its dust accompaniment. On the whole so far this has been as unpleasant a spring as has ever been experienced here, extremely high winds prevailing almost constantly.

Barley Bacon
And Beef

(Experimental Farms Note).

During the past few years the production of barley in Canada has increased enormously, while at the same time export demand has fallen off almost completely. The suitability of this crop to a wide variety of soil and climatic conditions, its freedom from disease and pests (for the corn borer it has no fears), together with its heavy yielding qualities, have combined to make it a desirable crop to grow in Canada. Just as corn is a desirable crop to grow in certain sections of the United States. One difference is that whereas the United States corn belt is limited in area, the barley belt in Canada knows no bounds, consequently we may confidently expect to have "barley to burn" for a few years to come. This is a heartening prospect if for no

other reason than to demonstrate to Canadian farmers that we do not have to depend on Argentine and American corn.

With no export demand for barley in its raw state, the situation would be a sorry one indeed were it not that we have in Canada the facilities for manufacturing this crop into two very staple commodities that are in demand both at home and in the export market, namely, bacon and beef, and have an exportable surplus. It is true that these commodities are not bringing the high prices that they once did but when the market value of barley is compared to the price that can be obtained for it by feeding it to hogs and beef cattle is a profitable way out.

It is a fortunate fact that barley is admirably suited to these two classes of stock. As a hog feed, it may be used in limited quantities in the growing ration and up to at least fifty per cent in the fattening ration, with the assurance that it will develop an entirely satisfactory class of bacon which is something that can not be said with the same degree of assur-

ance concerning the feeding of corn in similar quantities. As a feed for beef cattle, barley is undoubtedly the best of our Canadian grown coarse grains. Properly balanced by cheap, home grown leguminous roughages, barley can be used in almost any proportion of the grain ration up to one hundred per cent with excellent results. It is not too much to expect that the increased use of barley and other coarse grains, while at their present low price level, will make for a much better quality of beef being marketed, which in turn will help to create a demand for more beef in the future.

Visions Of Establishment Of An Iron Smelting Industry Is Seen For Ontario Province

Visions of the establishment some time in the future of a huge iron smelting industry in the district of James Bay were stimulated by the announcement that the government has withdrawn the unalienated portions of Belcher Islands, in Hudson Bay, from public exploitations pending a thorough investigation into the character and extent of the hematite deposits there.

Coupled with this, in the minds of those who foresee further extensive developments for Northern Ontario, was the fact that examinations of a most elaborate nature are at present being made on the suitability for all purposes of the lignite deposits in the Abitibi region.

Coal and iron being complementary the one to the other in establishing the basis of all manufacturing industry, the discovery and development of the two in such close proximity as Belcher Islands are to Abitibi have encouraged the hope that Canada's independence of external sources for the nation's supply of iron ore may eventually become considerably more than a "pious wish."

The prospect of the ore being transported in barges from the islands of Hudson Bay to the ocean port which the Ontario government proposes to found at the debouchment of the Moose River is one which has captivated the imagination of those most closely connected with the operations.

Expanding the theme, the possibility was envisaged of such a development furnishing an additional outlet for the coal of both Nova Scotia and Alberta.

In the case of the latter, where the case the coal could be water-borne all the way from Sydney, N.S., up the coast of Labrador, through the well-charted Hudson Straits and down to James Bay. In the latter case a comparatively short haul to the Abitibi coalleries to Churchill would bring the western product to tidewater.

The government's examination of the Belcher Islands deposits will be conducted under the supervision of the Department of Mines.

Farm Organization

Writer Mutuals Operating Costs Can Be Reduced and Production Stimulated

The history of agriculture demonstrates that operating costs can be reduced, production per worker stimulated, standards of living raised and national wealth increased by the adoption of farm organization to improvements in equipment, was the conclusion reached by Andrew Stewart of Manitoba Agricultural College who won the Royal Bank of Canada economics fellowship competition for 1929-31.

The prize was worth \$1,000. Second place was given to "Recent developments in wholesale and retail distribution," by George D. Thomson, of University of Toronto, and third place to "A Study of Empire Trade," by C. M. Routledge, of McGill University. Mr. Stewart's prize-winning paper was called "The economy of machine production in agriculture."

A Foulie Sow

Stanley Birt, of Nepean, Man., owns a sow which has given birth to 49 live pigs in one year, the facts of which he submits in a letter to the Free Press Prairie Farmer. On April 10, 1930, her litter numbered 18; on September 15, 1930, her litter was 12, and February 26, 1931, she gave birth to 19. The sow is part Hampshire and part Yorkshire, and is in splendid condition.

Languages In Europe

Publications in Linguistic Office show 125 languages are used in Europe according to an Associated Press despatch of January 21, 1931, from Geneva.

The leaders are: German spoken by 81,000,000; Russian, 70,000,000; English, 47,000,000; Italian, 41,000,000; and French, 39,000,000.

Direct Result Of Grading

London Advances Price Of Canadian Cheese Over New Zealand Product

No industry is favored with more instruction, inspection, guidance and encouragement from Government officials and self-appointed crusaders than is the enterprise we call dairymaking. But there is a good motive behind all this paternalism, and happily it is bearing fruit. From Dr. J. A. Rudick, Dairy Commissioner for Canada, comes this terse statement: "According to the 'London Crocker' the average London quotation for Canadian cheese for the calendar year, 1930, exceeded the London quotation for New Zealand cheese by 3.06 cents per pound."

When we add a cent per pound to the cheese manufactured in Canada (for that is what it really means) we begin to appreciate what cheese grading, factory improvement, payment by test, and general packing mean to the dairymen of this country. And when we recall that at one time New Zealand cheese was threatening the prestige of the Canadian product on the British market, we can quite properly give ourselves a pat on the back—Farmers Advocate.

(By Annetta)

CAPELET GIVES SMART NEW EFFECT

Today's interesting home frock is developed in a cotton shantung print in the new flattering salmon-pink tones.

The pretty shoulder capelet ending in an abrupt manner at the front, gives the effect of fared sleeves.

An interesting feature is the pointed treatment given the bodice to narrow to the breast.

The skirt, slightly flared, has an inverted pleat in the center-front which gives added width without detracting from its slim straight appearance.

This easily made dress, Style No. 198 is designed in sizes 20, 22, 24, 26, 28, 30, 32, 34 and 36 inches bust.

Such a bodice could well be carried out in white flat washable crepe silk with vivid maroon blue bandings.

Linon, plaid, striped tulle, silk, printed balise, gingham, etc., are delightfully lovely fabrics to select.

Wrap coin (coin is preferred). Wrap coin carefully.

Manitoba-Ontario Highway

Official Opening To Be Held Between Winnipeg and Kenora In September

Prominent men in political and business life of Manitoba and Ontario will participate in the celebration at the opening of the new link of the Trans-Canada highway between the two provinces.

The official opening will occur next September and will mark the joining of the road between Winnipeg and Kenora on the Lake of the Woods. On behalf of Manitoba the following men will be included in the official party: His Honor James Duff, M.C., minister of public works; Hon. R. A. Hoey, minister of education; Hon. J. H. Brown, M.C., minister of agriculture; Hon. J. H. Brown, M.C., minister of agriculture; Hon. J. H. Brown, M.C., minister of agriculture.

Patrons for Ontario attending will be: His Honor William D. Ross, lieutenant-governor; Premier G. S. Henry, Hon. C. McCrear, minister of mines; Hon. W. Finlayson, minister of mines and forests; and Dr. W. J. Gunn.

Branches in the two provinces of the Manitoba-Ontario-Trans-Canada Highway Association will foregather shortly to formulate an agreement on joint plans for the opening.

Canadian Public Health Association

Annual Meeting To Be Held In Regina In June

Regina will be the scene of another Dominion-wide convention in June when the Canadian Public Health Association holds its annual meeting here. The dates fixed are June 17 and 18.

At the same time the Saskatchewan Health Officials' Association will hold its annual meeting in conjunction with the Dominion body.

Dr. F. C. McMillan, deputy minister of health for Saskatchewan, is president of the Canadian Public Health Association, while Hon. F. D. Munroe is honorary president.

Dr. W. R. Coles, medical officer of health for Regina, is president of the Saskatchewan Health Officials' Association.

Interest In Horticulture

Societies In Saskatchewan Planning To Organize A Fall Circuit

Horticultural societies in Saskatchewan are planning to organize a fall circuit, reports W. E. Lake, Saskatoon University extension lecturer. The circuit will include Regina, Moose Jaw, Yorkton and Canora societies have been correspondence on this project and it is believed that the McIntosh and Prince Albert horticulturists may also join. A bulletin prepared by plant experts for the Horticultural Societies Association, listing the plants recommended for cultivation in Saskatchewan will be ready in a few days at the extension department of the University.

The Pacific Ocean covers 68,000,000 miles, the Atlantic 30,000,000. It would take all the water in the world 1,000,000 years to flow over Niagara.

WINS RECORD FOR BRITAIN

Keystone Note British speed driver, captured the motorboat record by piloting his motorboat at 103.73 miles an hour.

There is no need to make Canada beautiful. Nature did that for us with such a prodigious outpouring of fertility, such a majesty of mountains, such effectiveness of lake and river, that the worst efforts of man can only mar without breaking the scenic panorama that stretches from the grey rocks and green fields of the Atlantic coast to the riot of fragrant bloom where the warmer Pacific loses its waves against low-lying, green-clad hills.

Canada is beautiful. Canada has a beauty that is marvellous in the eyes of countless visitors and newcomers. What a pity, then, that little bits of the careless indifference of men and women! Think of those who have made lovely bits of garden in strange places—round the oaks in the desert, on the top of an arid mountain and, most of all, in the sunless bits of earth hidden behind the houses of great cities.

Yet in Canada, there are farm houses where we refuse the handful of seed, the hour or two of time, that would transform the homestead into a lovely garden. We let weeds riot where flowers would be so much nicer, and tramp on parched earth where grass might better make a springy carpet.

Sponsored by horticultural societies throughout the Dominion, we can have a "More Beautiful Canada Campaign" right across the Dominion in this year of 1931. A moving-picture is made up of endless tiny pictures which blend into a continuous scene when run off on the machine. So a beautiful Canada can only be made by a succession of beauty spots that coast to coast. And success can be achieved only by each one doing his little bit to beautify the home or with shrubs and flowers once or once the patches and corners that we have made unsightly through carelessness and neglect—Farmers Advocate.

Some animals, like the rabbit, have eyes on the side of their head; he, they are hunted, while others, like the cat, have eyes in front since they are primarily hunters.

Think of those who have made lovely bits of garden in strange places—round the oaks in the desert, on the top of an arid mountain and, most of all, in the sunless bits of earth hidden behind the houses of great cities.

Yet in Canada, there are farm houses where we refuse the handful of seed, the hour or two of time, that would transform the homestead into a lovely garden. We let weeds riot where flowers would be so much nicer, and tramp on parched earth where grass might better make a springy carpet.

Sponsored by horticultural societies throughout the Dominion, we can have a "More Beautiful Canada Campaign" right across the Dominion in this year of 1931. A moving-picture is made up of endless tiny pictures which blend into a continuous scene when run off on the machine. So a beautiful Canada can only be made by a succession of beauty spots that coast to coast. And success can be achieved only by each one doing his little bit to beautify the home or with shrubs and flowers once or once the patches and corners that we have made unsightly through carelessness and neglect—Farmers Advocate.

Some animals, like the rabbit, have eyes on the side of their head; he, they are hunted, while others, like the cat, have eyes in front since they are primarily hunters.

Keep Canada Beautiful

Everyone Can Share In Making Unusually Places Lovely

There is no need to make Canada beautiful. Nature did that for us with such a prodigious outpouring of fertility, such a majesty of mountains, such effectiveness of lake and river, that the worst efforts of man can only mar without breaking the scenic panorama that stretches from the grey rocks and green fields of the Atlantic coast to the riot of fragrant bloom where the warmer Pacific loses its waves against low-lying, green-clad hills.

Canada is beautiful. Canada has a beauty that is marvellous in the eyes of countless visitors and newcomers. What a pity, then, that little bits of the careless indifference of men and women! Think of those who have made lovely bits of garden in strange places—round the oaks in the desert, on the top of an arid mountain and, most of all, in the sunless bits of earth hidden behind the houses of great cities.

Says Manufacturers Should Take Care Of Raw Products From Western Canada Farms

Guard Seal Migration

Sea Plane To Be Used In Connection With Government Vessel

A Royal Canadian Air Force flying boat, equipped with wireless, will assist H.M.C.S. Arcturion in guarding thousands of fur seals on their annual migration to their breeding grounds in the Pribilof Islands, off Alaska.

The seal patrol will last for two months and the aircraft will make daily flights over the migrating seals to spot any attacks by hunters.

Under the sealing treaty of 1911 between Japan, Great Britain, United States and Russia, none but the Indians and other aborigines, armed with primitive weapons, are allowed to kill the seals on their way to the breeding grounds.

Two coastguard patrols the seal herd on its migration from southern waters and the task is taken up at the international border by the Canadian navy.

H.M.C.S. Arcturion will be acting as tender for the Vickers Vedette flying boat.

The Pribilof seals, of which there are more than 1,000,000, have valuable pelts than any other seals. They make a "grand circle tour" of the Pacific each year, leaving their breeding grounds in the fall and migrating south along the coast of Japan and then north again in the spring.

Dr. J. H. Brown, M.C., minister of agriculture, said that the seals contribute to the depletion of coast salmon may be settled this summer by experiments to be made in connection with the migration. Major J. A. Motherwell, chief inspector of fisheries for British Columbia, has arranged with W. E. Ditchburn, Minister of Indian Affairs, to have the stomachs of some 50 seals examined.

Shiver To Keep Warm

Doctor Says It Proves A Very Good Substitute For Heat

Lacking a comfortable-heated atmosphere or a fur coat, the thing to do when one is cold is to induce plenty of plain and fancy shivering, according to Dr. R. W. Swift, of the University of Rochester, who read a paper before the physiological section of the Federation of American Societies for experimental biology, in session in Montreal.

People shiver to keep warm—and it is a good substitute for heat, Dr. Swift said. Shivering is the body's method of manufacturing heat, he explained. Dr. Swift said he had experimented with volunteers who had been placed in a refrigerator for varying periods while electrical apparatus was attached to their bodies to register the efficacy of their shivering. Those who lost themselves in shivering stood the cold best, he said.

The Merchant's Best Trick

Newspaper Sells More People Than Any Employee

The director of a well-known chain store describes the local newspaper as "our best clerk." He explains that it sees more people, gets more of their individual time, works longer hours, and tells its story with more accuracy than any other clerk they can employ. These papers are going into the homes of people, and are assured of their friendly attention.

This is proved by the tremendous growth in importance of the press in the last few years, according to the director, who declares that today the local newspaper is the backbone of any constructive sales effort.

Newspaper Men To Meet At Regina A despatch from Ottawa states that the Canadian Weekly Newspaper Association, embracing a membership representative of 500 newspapers throughout the Dominion, will meet in annual convention at Regina the first week of July. This decision was announced following a meeting of the association directors at the capital.

Likely Lots More

Antique Dealer (to American): "Now, sir, if you'll step this way, I've a very fine specimen of a Queen Anne sideboard I would like to show you."

American: "Say, that old queen of yours must have had a big dining room. This'll be the eighth sideboard of hers I've been shown this week."

Eminent Assessment Figures

An increase of a million dollars in property assessment in the city of Edmonton is announced by city assessor Thomas Waller, the present year's figure being \$66,734,000.

Co-operation by Eastern manufacturers with Western farmers is the means by which Western Canada will return to prosperity, Senator W. A. Buchanan, of Lethbridge, Alberta, told members of the Toronto Board of Trade at a recent gathering.

Wheat can only be partially displaced in the West by diversified farming, Senator Buchanan said, but a reduction in wheat acreage is possible through the introduction of more stock raising and the establishment of sugar beet factories, vegetable canneries, cheese factories, milk condensaries and an extension in the sheep raising industry. What was needed with this diversified agriculture was the industries to take care of the raw products.

"Here's where the co-operation of the eastern manufacturer was required," he said. "A few western sheep raisers should be encouraged in the production of more Canadian wool. The wool trade is not so competitive with such wool industries as that of Australia, there was the basis of the wool trade in the West, in western Canada, the senator said.

Commenting on present conditions in the west, Senator Buchanan said the counts was "gravy" spots, but there was plenty of hope and confidence in evidence.

His belated talk of recession, which, he said, was found only in districts where agitators "got a chance to air their views." He claimed no depression, but rather a period of adjustment.

What many farmers needed to do was to live on reserves built up through a good crop-raising policy, take too many chances on "next year." They should also seek to live off the farm rather than buy canned vegetables, meats and milk.

Production of only the superior class of all products should be targeted, he said. The farmer, he said, should produce the best of his class.

The coal industry was in the worst situation in its history. "Unless action is taken," he said, "it will be for coal he could hold little hope for the industry in the future."

One industry which had not ceased during the depression, he said, was the production of oil. New fields were being found all the time and in the near future important quantities of oil could be produced in the west.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria. Harmless to the rectum or the stomach, mild and bland in its action. But its gentle action soothes a youngster more surely than a more powerful medicine.

"That's the beauty of this special children's remedy! It may give the tiniest infant—as often as there is need. In cases of cold, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation. It does any suggestion of bad breath. Whenever children don't sleep, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed."

CHAPTER XV.—Continued.

"I don't know what a ramsau is, Mr. Maxwell, and you don't need to tell me anything about Nick. Mom says he's good as gold, but he always did a change now and then, and when a cold-blooded vamp like Mr. Halliday gets hold of him, there's no monies' worth! I happen. Why at the movies last Saturday I see a young fellow with a wife and baby just led round by the nose by a woman no wicker than her. And he set a lot of store by his wife too. The best of men's children in the hands of us women, you can bank on that. Of course I ain't meanin' anything personal about Mr. Maxwell."

Mary smiled. She tried to switch her off into another subject by mentioning little Martha. "That's right, old Nick, no one could stop Julie when he got started. In fact, Mary's choice of subject was unfortunate, for Julie said:

"That's another thing. I suppose

Nick was trying to be polite, for he said something about how good Mr. Halliday was to do so much for."

Julie paused, and jerked her elbow toward the little girl who had slipped from Mary's lap and was amusing herself with a picture book. Julie loved her voice. "Now I hope to die, Mr. Maxwell, if this ain't the truth: If Mr. Halliday had his way that child would go to the poor farm. I got care in my head as well as eyes, and what I don't hear ain't worth hearin'; but she said to Nick, so sweet soundin' it would be, 'I wish honey taste like vinegar.' I took upon it as a privilege, Mr. Hastings—this chance to do something for a little child."

John Maxwell once said that Julie Nipp was a loss to the stage. His wife thought of it now, as her contrived innocently truthful eyes to an imaginary Nick. Then she straightened up and her lips tightened as she added: "And there at Nick, take it all in as innocent as a baby takes its bottle which like me not the wicked mamma's poisoned. Nick's awful trustin'. His uncle's the only ugly thing he ever run up against. I guess, and he don't know women. I don't remember what he answered but she begun again and said something 'n' high soundin' about the child makin' up to her for other disappointments. It sounded kind of like a back-handed slap at Mr. Halliday."

"Disappointments! That woman never had no worse disappointments than gettin' stuck with a coat that didn't match her eyes!"

Then she began to sing. It sounded awful pretty. I moved the curtain a mile and peeked out. Nick was still there on the steps below her cousin for all the world like he'd been handed a first class ticket to Paradise. Nick's real handsome, and he looked handsome's ever just then. I couldn't blame Mr. Halliday for fallin' for him. Then I thought of Gay, and I had half a mind to throw one of them pumps at him to break the spell. But I didn't need to. Just that minute little Nick set up an awful howl. It was like things happen in the movies, Mr. Maxwell—the child's cousin's father to his stern duty. Nick rose all right. He sprang through the door in the hedge like he'd been fired out of a shot gun, and now I'll tell you something's real interestin'—Mr. Halliday looked after him for a minute, and then she sort of shook her fist at Gay's nursery window where Nick switched on a light. I couldn't blame Mr. Halliday for said 'Damn!' or my name ain't Julia Amanda Nipp! Now what do you think of that?"

Mary Maxwell smothered an hysterical laugh.

"Yet I was awfully ashamed," she said that evening, when relating the scene to John. "It was terrible for me to listen to all that gossip; but you know Julie—it's like trying to shoot a door to shut her. And besides, I was worried about Nick. All our old fears for him came back when she began her story."

"You must remember," replied John Maxwell quickly, "that in the days before the movies our friend Julie would have been devoted to a dime novel. She craves excitement, and invents it where none exists. She can snuff a scandal long before it's born; but if she took Nick to task for bob-nodding with Mrs. Halliday, I think she'd meet her match."

He chuckled, but Mary said soberly: "Just the same, Johnny, I think Mrs. Halliday is a dangerous woman. I'm glad she's going back to Boston."

Mary Maxwell was not the only one who felt a sense of relief on the day that Angela Halliday and her numerous trunks, departed from Baker'sville. Her husband, who was to stay a day or two longer in order to prepare certain plans for little Martha, was distinctly glad of her absence, a feeling that was shared in good measure by Gay, who watched the departure from her front window, and, as the car drove off, surprised her small son with an ardent hug.

"It'll seem strange to not see Mrs. Halliday fustling around the parson's," said Nick that night at supper. "I wonder that anyone so fond of growing things can endure a winter in the city. I thought she looked tired when she left."

"When she left?"

"I was near at the station. I ran down to see her off. In fact, she suggested it herself. She thought Halliday wouldn't have time to go with her, and there were a lot of trunks to check. She's rather used to being waited on, you know."

Had Nick been looking at his wife he would have noticed an unfamiliar expression in her eyes.

"Of course, if one is willing to be helped one usually gets it," she responded, "but there are some of us who'd rather check our own trunks than ask a man to leave his business to do it for us."

"But I didn't leave my business,

I want to come home this noon anyway, you know, and I had lunch later in order to take in her train. However, as far as the trunks were concerned, I needn't have worried. Halliday saw to them himself."

"While his wife was bidding you a lingering farewell!" it would have been on some time to check those trunks. They filled a whole express wagon. How can one woman have such a wardrobe?"

Nick threw an amused glance across the table.

"What's the matter, old girl? Upset about the matter, or your remark's about the last bit of fun."

"Yes, I am upset," Gay confessed honestly, her color rising. "I don't think Mrs. Halliday would have asked you to see her off, nor do I think you should have gone. If she were a different woman I wouldn't care; but she's the sort people notice and speak about. Most of our friends knew you were out all night with her the time you came down with pneumonia—and you know how Baker'sville can gossip. I don't care for their gossip, but if we're to live here—"

"Why, my dear girl, Nick interrupted, "what do you mean? I never thought—"

"You don't think enough. Nick said that's the trouble. Because you love me, you can't imagine that anyone could misinterpret your actions. But they do. Why even Julie—"

"Julie Nipp is a confirmed scandal monger," Nick was angry. "I'm ashamed that my wife should be told anything she says. I believe it's her who's responsible for my unwarranted attitude toward Mrs. Halliday. The woman feels it, too. She said last night she wished you'd let her get nearer to you."

Gay lowered her eyes.

"I'm sorry you're ashamed of me," she said calmly, and at her voice Nick's good-humor never long disappeared. He arose, and going around the table, sat down on the sofa beside her.

"Oh, come on. Let's not get ruffled over a thing like this. Of course I'm ashamed of you. That was just temper. You're all I have to be proud of. Gay—you and the kiddies. If I'd known you'd mind my good

CORNS LIFT OFF

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application of two and the corn drops out. Wonderful—yes it is! But it is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any drug or drug for 35c.

PUTNAM'S

to the station I wouldn't have gone, of course. Personally I don't care what people say; but if you do, I'll be more careful. Here, kiss me. I believe, we almost quarreled. It's ridiculous. Don't you know that there's only one girl in the world for me?"

He sang the last words, and Gay had to smile, even though the tears were not far off. It was seldom that they came even as near as this to having words, and such things hurt her. Nick would forget, but Gay, womanlike, would feel the scars for a long time. She winked back the tears, but the eyes she lifted were very bright and Nick understood. He put an arm about her, and said, kissing her gently: "There! that's better. Not mad, are you?"

To his surprise she didn't smile, but arose quickly, as if to clear the table.

"Not mad," she answered. "Just—just a wee bit frightened—that's all." "Frightened? At what?"

His tone was fraught with astonishment; but Gay, managing something that was an excellent imitation of a laugh, refused an answer.

(To be Continued.)

Hospital Costs Advance

Charges Have Been Increasing Since 1913, Report States

An almost unbroken advance in hospital costs and charges between 1913 and 1929 are shown in a report issued by the Dominion Bureau of Statistics. The report is based on returns received from 198 hospitals in Canada. The rates charged in 1929 were 5.6 per cent. higher than in 1928.

A general survey of the changes which occurred in 1929 indicates that the greatest increase in rates were for public wards. Semi-private room rates moved upward very notably, while private room rates were shown as a little lower for the first time since 1913. Operating charges remained almost stationary. The average cost of maintenance per patient per day advanced again, and was \$10.4 per cent. higher than the figure given for 1913. It is interesting to compare this advance with that registered by rates, which have been rising by an average of 90 per cent. according to the movement of a weighted average for the rates figures which follow.

An average of the public ward charges made in 1929 amounted to \$2.03, as compared with \$1.96 in 1928. This item was \$1.83 in 1926, and \$1.02 in 1913, an almost uninterrupted increase having occurred since that time. Provincial average rates in 1929 ranged between \$1.50 for Prince Edward Island, and \$2.52 for British Columbia.

Jewish National Home

Lots Of Room For Jews In Palestine Says Lord George

Dr. H. H. David Lord George told the Jewish agency at a dinner in his honor in London, England, that there is plenty of room in Palestine for the Jewish national home without rendering homeless any of its present inhabitants.

The mandatory power of Great Britain in Palestine, he said, "must discharge its functions with ability and resolution."

The dinner marked the opening of a campaign for funds to establish a colony in Palestine named for Mr. Lord George.

Persian Balm appeals instantly to the daily woman. Stimulating the skin, making it velvety soft in texture, it creates and preserves complexion of exquisite charm. Delicately fragrant. Cool and delightful to use. Especially recommended to make thick lips softness or chafing. Stimulating and invigorating. Imparts a youthful loveliness. Protects and enhances the most delicate-textured skin. Persian Balm is the unaltered, tested, regular.

SELECTED RECIPES

EXCELLENT BEEF STEW

2 pounds of any cheap cut of beef.
½ cup raw dried turnip.
1 sliced onion, large.
4 tablespoons "Mazola."
2 cups diced raw potatoes.
1 cup diced raw carrots.
½ cup chopped celery.
1 tablespoon "Benson's" Corn Starch Flax.

Brown onions in "Mazola" with meat rolled in flour and then mix with the other vegetables and cook in 2 cups, or slightly more, of cold water, not allowing the stew to do more than simmer for one or two hours. Season with salt and pepper to taste. Thicken by stirring in tablespoon of "Benson's" Corn Starch into ½ cup of cold water and adding to stew when almost done. More corn starch may be added if a thicker gravy is wanted.

The best remedy for the disease called crime is after all, arrest cure.

FORNAT

SMP QUALITY

Just as you deal with people you know and trust, so you should buy goods that you know from experience will give full satisfaction and long wear. Beware of cooking utensils and household articles that bear no name or one you don't know. Look for the famous old, ALL CANADIAN SMP trade mark, the red and green shield, a strict guarantee of superior quality.

Canada's Poultry Industry

Poultry Population Now Five Times More Than It Was Forty Years Ago

Canada's poultry industry is forging steadily ahead. The poultry population of hens and chickens for 1929 numbered 56,217,000. This represents an increase of one million birds over 1928, and is in marked contrast with the total of 12,696,701 of 1901. Present indications are that Canada's poultry population for the present year will be practically five times that it was forty years ago.

The indications of worms are redness, grinding of the teeth, picking of the nose, extreme nervousness, convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Expeller. They will attack the worms as soon as administered, and they pass away the excretions. The little sufferer will be immediately eased and the danger of the attack will not be likely.

In proportion to population, more patents are issued to inventors of Switzerland than of any other nation. Our hearts still whisper: "Thou art near."

"A film is to be made of a baby's first year," says a new item. It should be a screen.

Sir Isaac Newton, as a boy, worked in an apothecary's shop rolling pills.

When Food Sours

But it kills excess acids. It has remained the standard with physicians for more than 50 years.

"It is the quick method. Results come almost instantly. It is a proven method. You will never see another when you know."

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for more than 50 years, correcting excess acids, gas bottles—any drugstore. So look for the name Phillips on wrapper and bottle. (Made in Canada)

Here is a Delightful Dessert!

BREAD PUDDING

2 cups Mr. Charles Milk
1 ½ cups soft, fine bread crumbs
1 egg, lightly beaten
1 cup sugar
1 cup raisins
1 cup currants
1 cup nuts
1 cup molasses
1 cup butter
1 cup vanilla

Soften the milk with water and bring to scalding point. Remove from fire. Add bread crumbs and let stand until cool. Stir in the egg, sugar, butter, salt and flavoring. Pour into a buttered pudding dish, set in a pan of hot water, and bake in a moderate oven about forty-five minutes.

This and over a hundred other delightful recipes are to be found in the new Recipe Book we have just issued. Send us your name and address and a copy will be mailed to you free of charge.

Sally: What makes you so giddy?

Dotty: I just came out of the circulating library.

The Mc-Dug harrow is equipped with a power lift device which operates on all three wheels to give the disks a high level lift. The power-lift device is simple and strong, and the clutch is covered by a dirt-proof housing, which insures long life. The operator controls the raising and lowering of the disks by means of a trip rope.

"Good Equipment Makes a Good Farmer Better."

the end of which he can tie within convenient reach from his position on the tractor.

The power for raising the disks is supplied by the hand wheel, which is especially designed to give ample traction.

A little extra bracing up will take the "out" of won't and then you have won.

Mrs. E. Fisher has joined the ranks of Mc-Dug Cream Separator owners.

The day is lost that does not add to your knowledge something which will help you to-morrow.

Mrs. H. H. Selland who is in a Calgary hospital is reported doing nicely. "My wife is like a stable of docile horses."

"Yeah! How's that?"

"Nag, nag, nag."

Barbara and Mrs. Dow

are reported much improved and Barbara expects to be home very soon.

If you want a light disk harrow for disk-harrowing wet ground, He brought a Mc-Dug side Type Disk Harrow. It meets these requirements exactly.

"Gee, when a fellow broke his friends won't help him."

"But worse yet, when a fellow has lots of dough they help themselves."

Lee Taylor is having an auction sale of my premises on Saturday evening this week. Don't forget.

Local and General

The Ladies' Aid meets at the home of Mrs. P. O. Sommers on Thursday, April 30th.

Mrs. Ed. Keilly, of Spokane, Wash., is here on a visit to her mother and is the guest of her sister, Mrs. Louis Miller.

Wednesday afternoon, the first to be observed as a half holiday was an exceptionally fine afternoon, a notable change.

B. M. Roberts had so far improved as to be moved from Vulean to Calgary on Wednesday. He was driven to the city by A. W. Jopling.

Mrs. M. G. Clever left on Monday driving her own car for Iowa. Mrs. Clever, has evidently no fear of long distances even if she is alone.

There is already a stir in Elkdom regarding the annual celebration of July 1st. With such an early start there should be a real time arranged for this year.

Mrs. D. W. Harper was the recipient of a handsome pyrex casserole from the Women's Institute, prior to her departure from Champion to Vulean.

A special Mother's Day offering is being taken in the United church on May 10th. A cent is asked for each year mother has lived. Use the large sized envelope.

B. M. Roberts continues to improve in the Vulean Municipal hospital, and is rapidly regaining strength. Many friends in this vicinity will wish his continued progress.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist 224-3th Ave West, Calgary will make his monthly visit to Champion Friday, May 1st, at the Drug Store.

An item in last week's Chronicle with reference to F. F. Fox and family should have read: F. F. Fox is returning to the Eastern States. His baby daughter, Edna, has been in the Holy Cross hospital, Calgary for the past two and one half months, but is expected home within the next month.

The United States has established more branch factories in Canada than in any other country outside of the United States itself, according to a report of the Industrial Department of the Canadian National Railways. At the beginning of 1930 there were more than 500 such factories in the Dominion representing an investment of \$510,500,000.

Dynamite one of the biggest pictures ever shown in Champion, Sat. Night April 25th.

E. J. Garland M.P. is surprising his constituents more than he is the house of parliament by his description of conditions existing here. In addition to being bankrupt we are supposed to be fainting from hunger at intervals and in a generally desperate condition. Premier Brownlee says Mr. Garland is describing conditions beyond his knowledge, and many others are of the opinion that the member for Bow River, in an effort to impress the government is sure heaping on the misery. The trouble is that such misrepresentation does more harm than otherwise. There is undoubtedly reason for steps to relieve the situation in regard to unemployment but the truth in describing it would do us as well as fiction.

The almost constant winds, with the atmosphere carrying all the dust it possibly could most of the time have not aided the progress of seeding, but considerable gains in the acreage sown have been made. Summerfallow shows quite satisfactory moisture content but naturally, present conditions would soon lower this to the vanishing point. Very little growth of grass or anything else has been possible with weather conditions so unfavorable.

The General Hospital, formerly the General Hospital, is now conducted by the Sisters of St. Martha, and will undoubtedly retain all the old popularity gained in past years and widen its field of operations under the new control. This has always been a favorable situation, particularly by rheumatic patients, and unquestioned results have been obtained. Note advt. in another column.

A Correction

Mrs. Minnie Cartlich of Vancouver, Wash., was omitted from the list of Mrs. Galloway's children published last week, and also Segal Hanson, a brother living in Missouri. It would also appear that Mrs. Galloway spent most of her time in Montana and Portland after her husband's death in 1912.

Here is without doubt the greatest effort of the scene. Gaity, richness, splendor, women, wine and a he-man and she-woman story that leaves you breathless! Unbelievable until you see it with your very own eyes! See Dynamite Sat. Nite.

Baby Clinic Well Attended

Eighteen children were examined at the baby clinic held under the auspices of the Women's Institute on Wednesday afternoon. Of this number, ten were babies under two years of age. Eight children had no defects of any kind.

The sweetest buy you every made. Those work shoes at Campbells \$3.95 pair.

Both Mrs. Dow and Miss Barbra are reported to be improving.

Mrs. H. H. Selland is reported to be making satisfactory progress in a Calgary hospital.

M. G. Clever is busy planting trees at his farm and on Fred Clever's town property.

Tennis promises to be extremely popular here this season to judge by the appearance of the courts any fine night.

Watson's all leather gloves 60c pair at Campbells.

Champion won from Nobleford at Badminton in an engagement at the first of the week.

"Top Speed" is the next talking picture Thursday April 30th.

PATHFINDER

Compare Your Old Tires with These

COMPARE their smooth worn tread with the safe, skid-resisting tread of the PATHFINDER. Test their weakened carcass against the sturdy Supertwist carcass of the Pathfinder. You'll see why you should have Pathfinder Treads for safety. And the saving in their price will convince you.

Come in and price your size. You'll be surprised.

Acreage Decrease Almost General

Russia would appear to be the only country that is increasing wheat acreage this year. In the three prairie provinces there would appear to be a general slight decrease in the amount of wheat sown, according to present reports, and a continuance of the present dry and windy weather, which seems to prevail over the whole country, is likely to accent the decrease. It is the one sure way of avoiding over production.

Ladies Silk Hose at Campbells, value to \$1.50 (special 60c pair).
